The even Hundreds are to be found at the top of the Table having their Dominical Letters over them, and are all Leap-years, as 1700, 1800, 2100 and 2800, have DC. The Parts of an Hundred are to be found in the side, and have their Dominical Letters against them in the first Column as 28, 56, 84, have DC, 1, 29, 57, 85, B, 2, 30, 58, 86, A, &c. To find the Dominical Letters for even Hundreds and Parts, the Rule is, Seek the Hundreds in the top, and the Parts in the side, and in the Angle of Meeting is the Dominical Letter, or Letters, so the Dom. Letter for 1682 is A, for 1683 G, 1684 FE, it being Leap-year F being used only till Feb. 25. and E all the rest of the year.

A Table

Shewing by the help of ye Dominical Letter what day of the week any Month of the year begins for ever:

	A	B	C	D	E	F	G
Ian 31	Sund	Satur	Fryd	Thur	Wedn	Tuesd	Mun
Feb 28	Wedn	Tuesd	Mund	Sund	Satur	Fryd	Thur
Mar 31	Wedn	Tuesd	Mund	Sund	Satur	Fryd	Thur
Apr 30	Satur	Fryd	Thur	Wedn	Tuesd	Mund	Sund
May 31	Mund	Sund	Satur	Fryd	Thur	Wedn	Tuesd
Iun 30	Thur	Wedn	Tuesd	Mund	Sund	Satur	Fryd
Iuly 31	Satur	Fryd	Thur	Wedn	Tuesd	Mund	Sund
Aug 31	Tuesd	Mund	Sund	Satur	Fryd	Thur	Wedn
Sep 30	Fryd	Thur	Wedn	Tuesd	Mund	Sund	Satur
Oct 31	Sund	Satur	Fryd	Thur	Wedn	Tuesd	Mund
Nov 30	Wedn	Tuesd	Mund	Sund	Satur	Fryd	Thur
Dec 31	Fryd	Thur	Wedn	Tuesd	Mund	Sund	Satur

Having by the last Table found the Dominical Letter for any Year you desire, underneath it in this table you have the Day of the Week each Month begins on throughout the Year, as the Dominical Letter for 1683, being found to G, under G you find Mon. Thur. &c find against them on the left side Ian Feb &c which shews that the first of Ian is on a Monday the first of Feb on a Thursday, &c if it be Leap year, and has two Dominical Letters you must use the first Letter only for Ian. and Feb. and for the other Months the second Letter, As the Dominical Letters for 1684, FE, F shews only that Ian. begins on Tuesday, and Feb on Friday, but E shews the beginnings of all the rest The Figures under each Month shew the number of Days, but in Leap years Feb has 29 Da

Having but the two former Tables, found what day of the Week the Month begins, This Table readily shews the Day of the Month. Example *The first of February 1683, is on a Thursday, and I would know what day of the Month the third Wednesday in that Month is? I seek for the Square in this Table that begins with Thursday, and in that Square look for Wednesday, and against it I find 7, 14, 21, 28, which are all the Wednesdays in that Month, the third answering the Question, being the 21st. day of the Month. Again, What day of the Week is the 16th of April 1684? By E the Dominical Letter for the latter part of the Year, I find in the precedent Table that April begins on Tuesday, and looking in that Square in this Table, I find the 16th day Wednesday.*

Prefix the first two figures	A Table for the readie finding of the Prime or Golden Number for ever						1100	2200	3300	4400	5500	6600	7700	8800	9900

1	19	38	57	76	95		5	11	16	2	7	12	17	3	8

The Prime by the Table is found after the same manner as the Dominical Letter, the even Hundreds to be found for at the top and the Parts on the Sides of the Table and when the number of Years consist of Hundreds and Parts, then the Sum of Meeting shews the Prime. Example. What is the Prime for the Year 1083? I seek for 1000 at the top, which I find in Page 5, underneath which and against 83 I have 12, the Prime desired. But without the Table, this is the Rule. Divide the Year of our Lord by 19, and to the Remainder after Division add 1, and the Sum is the Prime for that Year. So 1684, divided by 19 leaves 12, to which adding 1, it makes 13, the Prime of 1684. And in the Table under 1600, and against 84, you will find the Prime for that Year to be 13, as before.

The Prime by the Table is found after the same manner as the Dominical Letter, the even Hundreds to be sought for at the top and the Parts on the side of the Table, and when the number of Years sought consists of Hundreds and Parts, then the Angle of Meeting shews the Prime. Example. What is the Prime for the Year 1683? I seek for 1600 at the top, which I find in Page 5, underneath which, and against 83, I have 12, the Prime desired. But without the Table, this is the Rule: Divide the Year of our Lord by 19, and to the Remainder after Division add 1, and the Sum is the Prime for that Year. So 1684, divided by 19 leave 12, to which adding 1, it makes 13, the Prime for 1684. And in the Table under 1600, and against 84, I could find the Prime for that Year to be 13, as before.

Having found the Dominical Letter and Prime for any Year you desire, seek for the Prime in the Square next the Dominical Letter, and in a streight Line to the right hand under From Christm. to Shrove Sunday *you have the Weeks and Days from Christmas to Shrove Sunday, and under* Shrove Sunday *the Day of the Month Shrove Sunday happens on, and in the last Column under the Title Easter Day you have the time of Easter. Example for 1683, the Dominical Letter is G, and Prime 12, I seek for 12 against G and in that Line find 7 Weeks 6 Days, the time between Christmas and Shrove Sunday, and that Shrove Sunday is on Feb. 18. and Easter day on April 8. for that year. For 1684, Dom. Let. F E, and Prime 13, I shews only 6 Weeks 5 Days from Christmas, and that Shrove Sunday is Feb. 19 and E that Easter day is March 30.* The

This Table is but a continuation of the former, and after the same Method shews Rogation Sunday, Ascension day, Whitsunday, Trinity and Advent Sunday; Example for 1683 G being the Dominical Letter, and 12 the Prime, shews Rogation Sunday is on May 13, Ascension day May 17, Whitsunday May 27, &c. Again, for 1684, the Sunday Letters d c being Leap year, are C E, but the former serving only till Feb 25 I take E, and seek for the Golden number 13 against it, and guiding my Eye to the right hand, find Rogation Sunday to be on May 4, Ascension-day on May 8, Whitsunday on May 18, &c. In the same manner by the next Table you may find the Moveable Terms for ever. Example In 1684, Easter Term begins April 16, and ends May 12; and Trinity begins May 30, and ends June 18.
